Simplified Data Protection for Microsoft 365 Data

Protect your Microsoft 365 data with automated backups, unlimited retention, hassle-free restores, and easy exports - all from one dashboard.

Why should you backup Microsoft 365 apps?

- Data loss can occur due to accidental deletions, malicious activity, or software errors.
- Microsoft is not responsible for backing up your data and recommends that you use a third-party backup.
- Native Microsoft 365 tools offer limited retention and restoration capabilities.
- Regulatory compliance requires strict data backup and retention protocols.
- Microsoft will not retain or replicate your organization's folder structures when you restore backups.

Why SysCloud for Microsoft 365 backup?

- Simplified data protection with an intuitive backup dashboard.
- Recover data from any point-in-time backup snapshots with advanced restore options.
- Instantly export or download emails, OneDrive files and folders, People, and calendar events.
- Granular search and smart navigation facilitate rapid data location and retrieval.
- Advanced ransomware recovery and compliance gap insights*
- AI-powered copilot, Sky, to efficiently manage backups, troubleshoot errors, and access data through a chat interface.

*Available as an add-on

Ultimate Slack Data Restoration for all Subscriptions

Why should you back up Slack data?

- **No Recycle Bin:** Slack does not offer a recycle bin. Threads not included in a retention policy are lost forever if deleted.
- **Data Protection:** Only Enterprise Grid users get native data protection; others face manual recovery challenges.
- **Storage Caps:** All plans have storage limits, leading to forced data deletion or plan upgrades.
- **Restricted imports:** Only workspace-level import is available; no granular imports.
- **Edit & Delete Restores:** Only users with Enterprise Grid access can use the Discovery API to retrieve deleted or edited messages through exports.

What Slack Data Does SysCloud Protect?

Slack data	Backup	Restore	Export
Public channels	Yes	Yes	Yes
Admin/ Org owner's private channels	Yes	Limited	Yes
Non-admin's private channels	Yes Exclusive	Limited	Yes
Admin's direct messages	Yes	No API	Yes
Non-admin's direct messages	Yes Exclusive	No API	Yes
Files	Yes	Yes	Yes
User groups	Yes	Yes	No

Experience a Better Way to Protect Your Slack Data

Make smarter backups

Automate your daily Slack backups with unlimited retention.

Restore what you want

Directly restore a workspace or even specific channels and threads without a need for import.

Export workspace data

Export specific threads, channels, or even the entire workspace in readable .csv format.

eDiscovery search

Locate any conversation in the backup archive with powerful keyword search.

Get Comprehensive & Effortless HubSpot Backup

Why should you back up your HubSpot data?

- **Storage Caps:** HubSpot has set limits on records and objects, prompting users to delete excess data.
- **No Data Retention:** Most objects, once deleted, are gone forever.
- **Short Retention Period:** Bin items are held for only a limited number of days (30-90 days) before permanent deletion.
- **No Restore Options:** HubSpot doesn't support restoring previous data versions.

What HubSpot objects does SysCloud backup?

HubSpot Objects	Backup	Restore	Export
Contacts	Yes	Yes	Yes
Companies	Yes	Yes	Yes
Deals	Yes	Yes	Yes
Tickets	Yes	Yes	Yes
Products	Yes	Yes	Yes
Custom Objects	Yes	Yes	Yes
Engagements	Yes	Yes	Yes
Object Properties	Yes	Yes	Yes
Lists	Yes	Yes	Yes
Content (Pages, Posts, Emails)	Yes	Yes	Yes
Line Items	Yes	Yes	Yes
Tasks	Yes	Yes	Yes
Templates	Yes	Yes	Yes
Forms	Yes	Yes	Yes
HubDB	Yes	Yes	Yes
Files	Yes	Yes	Yes
Workflows (contact-based)	Yes	Yes	Yes
Users	Yes	Yes	Yes

Discover a better way to backup HubSpot

Make smarter backups

SysCloud automates HubSpot backups, managing API errors for you.

Unlock your recoveries

Easily restore any data snapshot, keeping all relationships intact.

Locate data instantly

Instantly access any HubSpot archive or dashboard.

Maintain object relationships

Restore deleted HubSpot records or overwrite existing records with a different version while keeping all their relationships intact.

QuickBooks Online Backup - Simplified Data Protection for All!

Why should you back up your QuickBooks Online data?

- **Limited recovery options:** Simple Start, Essential, and Plus plans do not offer any data retention to recover from accidental deletions.
- **No easy way to track deletions:** Tracking changes in transactions or deletions requires a cumbersome audit log review.
- **No granular restore:** None of the QuickBooks Online plans provide an option to restore individual transactions.

What QuickBooks Online data does SysCloud backup?

QuickBooks Online Features	Backup	Restore	Export
Transactions	Yes	Yes	Yes
Bills	Yes	Yes	Yes
Lists	Yes	Yes	Yes
Attachables	Yes	Yes	Yes

and many more..

Discover a better way to backup QuickBooks Online

Make smarter backups

A smart backup solution for QBO companies with faster backups- perfect for businesses of all sizes!

Automatically restore attachables

Restore transactions with associated attachables. No manual uploads needed.

Export easily

Export all your QuickBooks Online data from the backup archives in their original format.

Simplified Salesforce Backup with no Minimum Billing

Why should you back up Salesforce?

- **No Responsibility:** Salesforce advises third-party backups and isn't liable for data loss.
- **Complex Toolset:** Multiple solutions for different editions can be error-prone.
- **No Seamless Recovery:** Salesforce's paid data recovery is slow and causes downtime
- **Workflow Errors:** Restores can conflict with live workflows, causing errors.
- **Limited Retention:** Deleted objects are stored for 14 days only, then lost.
- **Data Tampering:** CSV format backups via native tools are vulnerable to tampering.

What Salesforce data does SysCloud backup?

Salesforce data type	Backup	Restore	Export
Standard objects	Yes	Yes	Yes
Custom objects	Yes	Yes	Yes
Metadata	Yes	Yes	Yes

Back up your Salesforce objects and metadata with a single tool

Make smarter backups

SysCloud auto-backs up Salesforce data and metadata, managing schema and API issues.

Optimized Salesforce API usage

Control Salesforce API usage with SysCloud's one-click optimizer for seamless backups.

Granular restore and restore preview

Restore specific records while preserving their relationships.

Automated Backup and Unlimited Retention for Box

Why should you back up Box data?

- **Limited trash recovery:** Files can be recovered from the trash only within 30 days. Files deleted from the trash can only be restored within 14 days through customer support.
- **No cross-user restore:** Box cannot restore files to a different user.
- **Lost sharing permissions:** Sharing permissions are not retained when files are restored with Box native retention.

What Box data does SysCloud protect?

Box Data Types	Backup	Restore	Export
Users	✔ Yes	✔ Yes	✔ Yes
Folders and sub folders	✔ Yes	✔ Yes	✔ Yes
Owned files	✔ Yes	✔ Yes	✔ Yes
Shared files	✔ Yes, if the owner is also backed up	✔ Yes	✔ Yes
Collaborations (Sharing permissions)	✔ Yes	✔ Yes, with the sharing permissions intact	✔ Yes
Trash	✘ No	✘ No	✘ No
Groups	✘ No	✘ No	✘ No

Experience a better way to protect your Box files

- Simplified data protection with an intuitive backup dashboard.
- Recover files from any point-in-time backup snapshots with folder structure, comments, and collaborations intact.
- Instantly export specific files, folders, or an entire Box user account and instantly download it.
- Instantly access any Box archive or dashboard using granular search or smart navigation.
- AI-powered copilot, Sky, to efficiently manage backups, troubleshoot errors, and access data through a chat interface.
